Appendix to Bid Data Sheet

Policy of 'One Contract Award for One Bidder' under a Group of Works' Contract Packages (CP-03 & CP-04)

The package CP-03 is for Design/Engineering, Construction and Commissioning of Pump Station and Reservoir at T.K. Halli with Operation and Maintenance (O&M) of 7 years.

The Package CP-04 is for Design/Engineering, Construction and Commissioning of Pump Station and Reservoir at Harohalli and Tataguni with Operation and Maintenance (O&M) of 7 years.

In consideration of possible formation, in general, of in-compatible alliance among the various bidders and apprehension on the part of the Employer, due to non-performance or under performance of the contract by the successful bidder/bidders after award of the contract, it is determined by the Employer that one works contract will be awarded to one bidder only under one group of contracts comprising similar type of works.

Based on the experience of earlier project, now therefore the Employer – BWSSB, intends to award the different contracts of the same group, to different bidders qualified to perform the contract.

This is with the intention not only to augment the conscientious competition among the bidders and also to safeguard against breach of the performance and/ or under performance of the contract by a single bidder who, in case otherwise, has been awarded multiple or all contracts of a one group of contracts. The policy is being adopted by the Employer to mitigate the risk, to some extent, of affecting the progress of the execution of the projects in case dispute, if any, arises with the contractor who has been awarded multiple contracts of one group of Contract packages

For the preset bidding documents two pumping stations and reservoir packages namely Contract Packages CP-03 and CP-04 falls under same group of Contract packages of pumping stations.

As per JICA instruction in this matter in case either of Contract Packages is awarded to one bidder who is either a single entity or a Joint Venture of partners then from remaining of the group contracts none will be recommended for awarded of that contract.

For example, if a single entity or a JV firm comprising Company –A and Company B is already awarded with one contract of the group then one more contract of same group shall not be to the same single entity or to the same JV or to any other JV in which either Company A or Company B is one of the partners in that JV.

This could be understandable from the illustration as below:

In the below illustration X and Y are single entity bidders, while A + B or C + D are typical combination of JV partners:

In case of Single Entity

X	Y	Permitted
X	X	Not Permitted

In case of Joint Venture

In case of combination of Single Entity and Joint Venture

1.2 Economic Evaluation

Any adjustments in price that result from the procedures outlined below shall be added, for purposes of comparative evaluation only, to arrive at an "Evaluated Bid Price." Bid Prices quoted by Bidders shall remain unaltered.

In addition to the criteria listed in ITB 38.2 (a) – (c) the following criteria shall apply.

1.2.1 Quantifiable nonmaterial nonconformities

Pursuant to ITB 34.3 and ITB 38.2 (d), the cost of all quantifiable nonmaterial nonconformities or omissions (minor omissions or missing items) shall be evaluated. The Employer will make its own assessment of the cost of any nonmaterial nonconformities and omissions for the purpose of ensuring fair comparison of Bids.

1.2.2 Award criteria for Multiple Contracts (ITB 36.4) :Appendix to BDS to be referred.

1.2.3 The Price Bid evaluation will be done inclusive of all Taxes and Duties.

1.2.4 Other Factors

The following factors and methods will apply under ITB 38.2 (f):

a) Operating and Maintenance Costs

Since the operating and maintenance costs of the facilities being procured form a major part of the life cycle cost of the facilities, these costs will be evaluated according to the principles given hereafter, including the cost of spare parts for the duration of operation and Maintenance stated below and based on prices furnished by each Bidder in Price Schedules, as well as on past experience of the Employer or other employers similarly placed. Such costs shall be added to the Bid Price for evaluation.

The operating and maintenance costs factors for calculation of the life cycle cost are:

i. Number of years for life cycle:

Seven years of operation and maintenance including one year of Defect liability Period.

ii. Annual operating and maintenance costs [as per the priced Price Schedules of the Bidder, including cost of spare parts for the 7 years period of Operation and Maintenance]**iii. A rate of 9% (Nine Percent), to be used to discount to present value all annual future costs calculated under (ii) above for the period specified in (i).****b) Specific Additional Criteria**

The following additional criteria will be used in the evaluation:

• The Electricity Cost:**i. The estimated total cost of the electricity required at and consumed by the Plant and equipment during the 7 Years of Operation & Maintenance:****a) The power consumed by the equipment supplied as a part of the facilities, based on calculations of the operating efficiencies and power consumption of all electrically-operated Plant and equipment under working condition.****ii. The Evaluation shall further be considered as:**

Based on the equipment selected, the bidder shall provide net guaranteed power consumption during operation and maintenance. This net guaranteed power consumption shall be multiplied by the current rate of electricity charges of Rs.5 per kWh and shall be added to the overall operation and maintenance cost provided by the bidder; which then will be used to determine Present Value (PV) (O&M) for each year and for the total duration of O&M-

(c) Specific additional criteria

The following additional criteria will be used in the evaluation:

Cost Evaluation for the Cost of Electricity for Pumps and Motors

In the following Tables, the worksheets that will be used for calculating the annual operating costs for the operating period of twenty (20) years is presented. These worksheets will be used to provide a common basis of comparison for calculating the estimated power costs for operating the pump stations for bid evaluation purpose.

The Differential of Total Discounted Power Cost for all pumping stations will be added to the Bidder's bid price to obtain the Evaluation Bid Price upon which the decision for award of Contract will be based.

Table 1.1:- Cost loading for Power - Main Pumps

Sr. No.	Guaranteed Performance		Pumping Stations
			T K Halli
1	Capacity	Cum/hr	5920
2	Total head (minimum)	MWC	132
3	Minimum Pump efficiency at duty point	%	86
4	Power input to pump at duty point	kW	
5	Minimum Motor Efficiency (At full load)	%	95
6	Power input to motor at duty point	kW	
7	Cost loading rate for power input to motor considering working number of pump sets	Rs./kW	
8	Cost loading for power input to each pump set (6 x 7)	Rs.	
9	Total Number of Pump working sets		6
10	Cost loading for power input to total number of working pump set (8 x 9)	Rs.	

Note: The pump and motor efficiency mentioned in the above Table is minimum requirement of the bid.

1.2.5 Award Criteria for Contract (Evaluated Bid Price)

The O&M NPV cost inclusive of power cost calculated as per the procedure stipulated above will be added to the Bid Price (capital costs for Design Build) to obtain the Evaluated Bid Price upon which the decision for award of contract will be based.

The Bidders' attention is directed to the fact that the operating costs for low efficiency Plant and equipment will be substantially higher than the operating costs for high efficiency Plant and equipment, and that the cost differential over the 7 year period used in this calculation will, in all probability, greatly exceed any incremental capital cost savings which may be realized by offering lower efficiency Plant. Bidders are encouraged to offer Plant and equipment which has high efficiencies at the specified operating conditions.

The O&M Price to be quoted by the Bidder in two parts: One is Fixed Cost for Manpower engagement with minimum wages prescribed by the Employer and the other on a variable cost.

Award criteria for Contract is the lowest evaluated bid price.

2. Qualification

(i) Exchange Rate for Qualification Criteria

- a) For turnover or financial data required for each year:- Exchange rate prevailing on the last day of the respective financial year of Employer's country.
- b) Value of single Contract:- Exchange rate prevailing on the date of the Contract.

Exchange rates shall be taken from the publicly available source identified in BDS37.1 or in case such rates are not available in the source identified above, any other publicly available source acceptable to the Employer.
